- IntelCenter video used by films and tv shows such as Syriana and The Sopranos
- Founded in 1989 and focused on terrorist & rebel groups since early 1990s
- IntelCenter's primary customers are military, intelligence and law enforcement communities

Research & Approval

RESEARCH

- You can subscribe to the IntelCenter Database (ICD) to view all materials and resources available from IntelCenter including streaming video, still photographs, statements and more. All videos and other materials have unique ID#s that can be used to let us know which materials you need or have questions about. Subscriptions are available on a monthly, quarterly or annual basis and include 24/7 support. You can subscribe and see additional details at <http://intelcenter.com/icd/>
- Videos not currently in the ICD can be requested and usually loaded into ICD for viewing within 24-hours.
- IntelCenter videos are the full unedited versions as released by terrorist and rebel groups and have been authenticated by IntelCenter as coming from the group identified.

APPROVAL FOR LICENSING

- IntelCenter will support and license video footage and other materials to all educational and news documentaries. IntelCenter will not provide materials to any films with a strong political agenda regardless of which way it goes. To be approved for licensing please provide some details about your film by filling in the form at: <http://intelcenter.com/documentaries-contact.html>

Audio & Video Files for Editing

Once you have identified the audio/video footage you need using the ICD and received approval, you can order Quicktime .mov files for editing in the H.264 format with AAC audio.

They are available in two versions, however, we strongly recommend using the TYPE I format used by most documentaries and news organizations as it is the lowest cost and easiest to work with:

TYPE I - Includes a mandatory IntelCenter bug in small white letters in the upper right or upper left corner that may not be removed

- Fee is a straight \$125 USD per video (order one for each ID# you need)
- Full video provided, edit out the clips you need
- No additional licensing fee
- Can be purchased online at <http://store.intelcenter.com/products/type-I-video-file> (follow instructions on page, once your files are ready we will send you a download link)

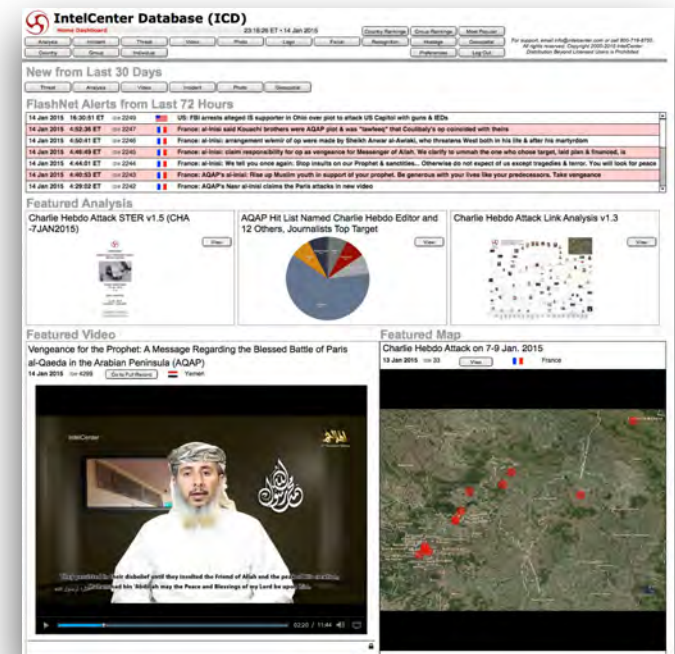

CUSTOM - Remove or otherwise cause to not be visible the IntelCenter bug

- Fee is \$160 USD per clip plus \$1,000 USD per 30 seconds licensing fee for footage used
- Full video is NOT provided, must provide timecode of clips you need based on streaming version in the ICD

IntelCenter Database (ICD)

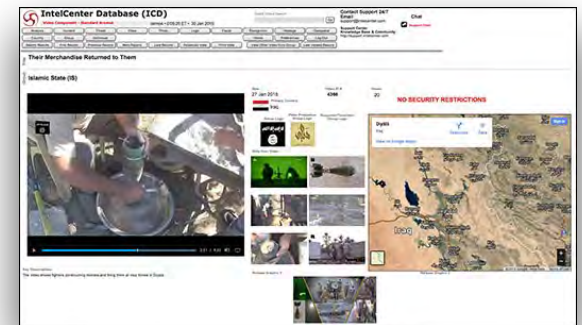

- 15 different data sources
- 151,000+ records spanning 16+ years
- New information added 24/7
- Live charting and visualizations of key data
- Customizable email notification system for new data
- 24/7 email & live chat support
- Online support knowledge base & user community
- 4 global networks of servers to accelerate access speed
- Aggressive upgrade path for server architecture and bandwidth
- Encrypted web accessible database works on desktops, smart phones & tablets
- Can be replicated on LAN or have raw data exported for import into other tools

IntelCenter Database (ICD) Video Component

- Largest archive of released terrorist and rebel video in the world covering last 24 years
- 1,200+ hours fully tagged and searchable in online database (7,000 hours in full archive)
- 4,300+ audio/video releases
- Highest-quality versions and metadata
- Grows daily
- Now routinely collecting 1080 HD videos
- Ready for 4K video
